The brand presents an elevated collection of ready-to-wear garments, footwear, and accessories designed for discerning tastes and versatile lifestyles. The range features impeccably crafted pieces including round neck tees, collared tees, polo shirts, sweaters, t-shirts, hoodies, pullovers, jackets, and fine knits. Casual essentials such as ganjis, boxers, pyjamas, undergarments, socks, and wristbands blend comfort with sophistication. For formal and semi-formal occasions, the offering includes tailored suits, blazers, crisp shirts, refined trousers, elegant ties, and premium belts. The footwear selection encompasses both casual and formal styles, highlighted by expertly made leather shoes. A signature leather collection showcases luxurious leather jackets, trousers, suits, and belts. Completing the ensemble are thoughtfully designed accessories including caps, ties, and wristbands—each piece curated to elevate personal style with timeless appeal.

Chemical preparations for use in scientific research, industry and general industrial manufacturing; biochemical reagents for non-medical purposes, namely, for detecting biomolecules or biomolecular interactions in the field of life science research; biochemical reagents for non-medical purposes, namely, for detecting biomolecules or biomolecular interactions in the field of life science research, for in-vitro research use; biochemical reagents for non-medical purposes, namely, fluorescent reagents for measuring biomolecules or biomolecular interactions in the field of life science research, for in-vitro research use; Chemical and biochemical reagents for use in scientific research, namely, chemical and biochemical reagents for protein labelling to be used in life science and drug screening research; Chemical reagents, namely, fluorescent dyes for labeling proteins for scientific and research use; Kits comprising assays and reagents for screening embryos for chromosomal abnormalities for medical research purposes; kits comprising assays and reagents for analysing chromosomal content of embryos for medical research purposes; kits comprising assays and reagents for screening embryos for suitability for in vitro fertilization for medical research purposes; kits comprising assays and reagents for testing chromosome content for use in assisted reproductive technologies for medical research purposes; Reagents, and kits consisting primarily of reagents, for nucleic acid amplification for scientific, forensic and research use; reagents, and kits consisting primarily of reagents, for polymerase chain reaction for scientific, forensic and research use; PCR reagents, and kits consisting primarily of PCR reagents, for scientific, forensic and research use; PCR kits comprising nucleotide solutions, oligonucleotides, buffers and reaction reagents for scientific, forensic and research use; reagents, and kits consisting primarily of reagents, for whole genome amplification for scientific, forensic and research use; reagents, and kits consisting primarily of reagents, for whole genome application from single cells or limited DNA templates for scientific, forensic and research use; reagents, and kits consisting primarily of reagents, for chromosomal, genomic, mitochondrial, genetic and/or sequencing analyses using whole genome amplification for scientific, forensic and research use; chemical preparations for scientific purposes, other than for medical or veterinary use; chemical preparations for analyses in laboratories, other than for medical or veterinary purposes; Chemical reagents for non-medical purposes; Chemical substances for analyses in laboratories, other than for medical or veterinary purposes; Reagent paper other than for medical purposes; Test paper, chemical; Diagnostic preparations for scientific purposes, namely, immobilized proteins, nucleic acid sequences, allergens and biological tissue cultures; unprocessed synthetic resin compounds in the form of microspheres used to incorporate various other substances; chemically-treated nonmedical test strips for use in for use in analyzing nucleic acids, proteins, cells and tissues; reagents for scientific and research use for labeling, sequencing and fragment analysis of nucleic acids and proteins; polymeric membranes in chemical form for the separation of liquid gas and patient samples; Diagnostic preparations, agents and substances for scientific purposes, in particular tissue sections and immobilised proteins on a carrier or a carrier material, in particular on a biochip, microsphere, test strip, blot, microplate or membrane; Human cells and isogenic cell lines for scientific, laboratory or medical research; genomic reference control samples for medical laboratory use; molecular biology research tools, in the nature of biological and biochemical reagents, specifically, genomic DNA used for scientific, laboratory or medical research purposes; DNA repair enzymes for scientific and research purposes; biological and chemical reagents, namely, genomic DNA, cell cultures and mutant and normal isogenic human cell line pairs, for research use; reagents, plasmids and assays for scientific, genetic and medical research; biological preparations in the nature of separate base

editing components including mRNA, rRNA, gRNA, deaminase, nickase, ribonucleotide protein (RNP) for use in scientific, laboratory or medical research; biological preparations in the nature of genetically modified cells and vectors for scientific and research purposes; biological and chemical reagents including complexes of these molecules for research and for clinical and industrial use; compounds containing nucleosides for scientific or medical research use; Medical diagnostic assay kits containing antibody reagents and processing chemicals for scientific or research laboratory use; Immunoassay preparations, namely, antibodies and processing chemicals for research on cell cultures and other biological samples; Chemical products, namely, 1,25-dihydroxyvitamin D for diagnostic use, namely, diagnostic preparations for scientific or research use; Chemicals for use in industry, science and photography, as well as in agriculture, horticulture and forestry; unprocessed artificial resins, unprocessed plastics; fire extinguishing and fire prevention compositions; tempering and soldering preparations; substances for tanning animal skins and hides; adhesives for use in industry; putties and other paste fillers; compost, manures, fertilizers; biological preparations for use in industry and science.

Cl.5; Biomedical reagents in the nature of contrast media for in vivo imaging of molecular and morphologic targets and processes in humans and animals; chemical reagents for medical or veterinary purposes; diagnostic preparations for medical or veterinary purposes; preparations for detecting genetic predispositions for medical purposes; medical diagnostic reagents and assays for testing bodily fluids; diagnostic kits consisting primarily of polymerase chain reaction (PCR) mixes for detection of aneuploidies in chromosomes for medical use; diagnostic reagents, assays and kits for medical use, namely, for detecting, diagnosing, treating and monitoring of genetic disorders; chemical test kits comprised of chemical reagents for cell assays for medical and veterinary use; reagents for medical use; Nucleic acid sequences and chemical reagents for medical and veterinary purposes; Protein arrays for medical diagnosis purposes; Diagnostic kits consisting primarily of monoclonal antibodies, buffers, and reagents for use in disease testing; Medical diagnostic testing kits containing diagnostic reagents and tests for medical diagnosis designed for use in clinical and medical laboratories for screening for inflammatory diseases and monitoring patients previously diagnosed as suffering from these diseases; medical diagnostic test kits to be used by staff of clinical and medical laboratories for medical diagnosis, screening and monitoring of inflammatory diseases, comprising one or several tubes, antibodies, a tracer compound and lyophilisates used to reconstitute control solutions; Products intended for the implementation of biological/biochemical assays for in vitro diagnosis, namely immunoassay kits for use by clinical laboratories, containing labelled antibodies or antigen for in vitro diagnosis of cancer, infection, inflammation, auto-immune, cardiovascular and nervous system diseases; Medical diagnostic testing kits containing diagnostic reagents designed for use in clinical and medical laboratories, for the diagnosis, screening or monitoring of tumors, organ dysfunction, multiple organ failure, sepsis and systemic inflammatory response; medical diagnostic test kits to be used by staff of clinical and medical laboratories for the diagnosis, screening or monitoring of tumors, of organ dysfunction, multiple organ failure, sepsis and systemic inflammatory response, comprising one or several tubes or plates, antibodies, a tracer compound and lyophilisates used to reconstitute control solutions; medical diagnostic test kits for theimmunoassay of human chromogranin A in serum or plasma to be used by staff of clinical and medical laboratories; Kits comprising reagents for medical use for screening embryos for chromosomal abnormalities for medical purposes; kits comprising reagents for medical use for analysing chromosomal content of embryos for medical purposes; kits comprising reagents for medical use for screening embryos for suitability for in vitro fertilization for medical purposes; kits comprising reagents for medical use for testing chromosome content for use in assisted reproductive technologies for medical purposes; Biological reagents for medical use; diagnostic kits for medical use comprising reagents for use in purifying T cells from blood; Assay kits comprised of chemical, biological and biochemical components for use in medical diagnosis, prognosis and therapeutic monitoring; Pharmaceutical and chemical preparations for use in gene and cell therapies, chemopharmaceuticals for use in chemotherapy, culture of microorganisms for medical purposes, preparations and biological products, chemical products, diagnostics for therapeutic and medical purposes; Diagnostic preparations for clinical or medical laboratory use; Diagnostic preparations for medical and veterinary purposes in the fields of neurological diseases, infectious diseases, autoimmune diseases, allergies and cancer; diagnostic agents for medical and veterinary purposes, namely immobilized proteins, nucleic acid sequences, allergens and biological tissue cultures; reagent paper for medical or veterinary purposes; medical diagnostic test strips for testing blood, urine and saliva in the diagnosis of neurological diseases, infectious diseases, autoimmune diseases, allergies and cancer; medical diagnostic reagents; biological and chemical preparations and reagents for medical or veterinary purposes, namely, cells for medical or clinical use, cultures of microorganisms for medical or veterinary use, protein arrays for medical diagnosis purposes, synthetic peptides for the treatment of neurological diseases, infectious diseases, autoimmune diseases, allergies and cancer and nucleic acid sequences for medical and veterinary purposes; Biological tissue cultures for medical purposes, namely, protein cell lysates, genomic DNA preparations and Formalin Fixed, Paraffin Embedded (FFPE) engineered tumor tissue mimics; Pharmaceutical preparations and therapeutic agents for the treatment of cancer; Diagnostic preparations and materials generated by the use of base editing components for medical purposes; chemical preparation for use in DNA analysis for medical purposes; biological preparations in the nature of DNA, RNA and parts thereof for medical purposes; biological preparations in the nature of DNA extracts for medical purposes; biological preparations in the nature of gene editing enzymes for medical purposes; biological preparations in the nature of protein cell lysates, genomic DNA preparations and Formalin Fixed, Paraffin Embedded (FFPE) engineered tumour tissue mimics for medical diagnostic use; biological preparations in the nature of biological, biochemical and chemical reagents, including living cells, genetically modified cells and vectors, genomic DNA, cell cultures and mutant and normal isogenic cell line pairs, peptides, proteins and nucleic acids or complexes of these molecules for medical use; all the aforesaid goods being medical preparations; Medical diagnostic assay kits containing antibody reagents and processing chemicals for clinical medical use; Immunoassay preparations, namely, antibodies and processing chemicals for clinical use on cell cultures and other biological samples; diagnostic testing materials including delipidation agent and 1,25-dihydroxyvitamin D binding partner for medical use, namely, diagnostic reagents and assays for testing body fluids; Blood products, namely cord blood and peripheral blood stem and progenitor cells

Cl.9; Scientific instruments and apparatus for use in the fields of academia, agriculture, biotechnical and medical imaging, forensics, genetic screening, life science research, medicine, pharmaceutical analysis, namely, liquid handlers, live cell imagers, in vivo imagers, microplate readers and imagers, gamma and scintillation counters, and microplates; microscopes; spinning disk confocal microscopes featuring electronic synchronization controls; synchronization control units for spinning disk confocal microscopes; confocal scanning systems for use with microscopes, consisting primarily of a confocal scanner, an illumination source, a charge coupled device detector, computer hardware and downloadable computer software for image acquisition; microarray scanners; radiometric detectors; automated liquid handling workstations for use in assay procedures, consisting primarily of computer-controlled robotic arms for laboratory purposes, mounted on a platform, used for pipetting liquids and for moving microplates and other objects from one location to another, and featuring computer software for operating liquid handling equipment; dispense heads for use in laboratory liquid handling devices; pipetting tips for use in liquid handling machines in the field of life science research; microplates; laboratory equipment and supplies, namely, microplates and reagents sold as a kit for use in scientific and pharmaceutical research; cellular screening laboratory apparatus for use in performing cell-based assays by means of luminescence and fluorescence detection; apparatus and instruments for research in laboratories and for analysis of microtiter plate based assays, namely, instruments comprising an imaging detector, a telecentric lens, illumination light source, emission and excitation filters and sample plate handling mechanics to automatically position sample plates in a well-defined position for imaging of the sample; computer workstation comprised of downloadable computer software for controlling instruments, measuring protocols, defining sample plates, measurement technologies and optical components,

and storing measurement data in a database and lets the user investigate the data and export it for further off-line analysis; laboratory apparatus, namely, cellular luminescence and fluorescence workstations consisting primarily of micro-titer plate readers, automated liquid-flow and liquid-level control machines and instruments, computers and downloadable data analysis and reporting software for analyzing and reporting data obtained from the workstation; laboratory robots; computer hardware; downloadable computer software for use primarily in the field of pharmaceutical research, for analyzing fluorescence detection data; downloadable computer software for controlling analytical laboratory instruments, and for managing and reporting data generated by such instruments; laboratory apparatus and equipment, namely, an imaging system comprising downloadable computer software, computer hardware, monitors, cameras, optical couplers, optical polarizers, light filters and polarizing compensators for the measurement and analysis of stress, polarization, optical retardance, birefringence, and related properties of both macroscopic and microscopic samples; downloadable computer software for research purposes for viewing, measuring, and analyzing digital images, including color images and multispectral images, sold alone or as a system with computer hardware; laboratory equipment, namely, digital imaging systems comprising an illuminator, a digital camera, optical interference filters and a tunable filter, used for fluorescence optical imaging of samples, and downloadable computer software for use in operating the digital imaging system, or interpreting the images obtained thereby, computers, and adaptors for lenses and microscopes, all of the foregoing sold separately or as a unit for fluorescence optical imaging; laboratory equipment, namely, digital imaging systems comprising a digital camera and a tunable filter, used with microscopes or lenses to obtain images of microscopic and macroscopic samples or of natural scenes, and downloadable computer software for use in operating the digital imaging system, controlling the microscopes or lenses, or interpreting the images obtained thereby, and adaptors for microscopes and lenses, all of the foregoing sold separately or as a unit for multispectral optical imaging; automatic laboratory equipment, namely, a robotic workstation consisting of robotic arms used for transferring, dispensing and diluting liquids in drug screening applications; laboratory apparatus and equipment, namely, automated light microscope system consisting primarily of a light microscope, computer hardware and downloadable computer software for optical imaging; downloadable computer software for application and database integration; downloadable computer software for creating searchable databases of information and data; downloadable computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information; downloadable computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface; downloadable computer software to automate data warehousing; downloadable computer software for providing and searching information in the field of chemistry, namely, information on chemicals, chemical structures, drawings, and properties, and related molecules; downloadable computer software for providing chemical supply information, namely, information about chemical supplier catalogs, chemical suppliers, chemical availability, chemical safety, chemical handling, and chemical procurement; downloadable computer programs for use in drawing biological pathways and instruction manuals sold therewith as a unit; downloadable computer programs for use in searching information and information integration in the fields of biology and chemistry, and instruction manuals sold therewith as a unit; downloadable computer software for creating searchable databases of chemical reaction data; electronic databases in the field of biological and chemical research information recorded on computer media; downloadable mobile applications for creating, editing, transmitting, storing, collaborating, importing, and organizing data and information in the field of chemistry; downloadable mobile applications for creation, edit, transmission, storage, collaboration, importation, organization of data and information; downloadable computer application software and downloadable software systems for the collection, editing, organizing, modifying, transmission, storage and sharing of data and information related to chemical research and analysis; downloadable computer programs for use in chemical structure drawing, molecular modeling and analysis, and searching information and information integration in the field of chemistry; downloadable computer software for creating searchable databases of information and data, wherein the information and data is contained within documents and wherein the documents do not relate to customer care, financial management, billing management or ophthalmologic data; downloadable computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information, wherein the data and information is contained within documents and wherein the documents do not relate to customer care, financial management, billing management or ophthalmologic data; downloadable computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface, wherein the database content is documents and wherein the documents do not relate to customer care, financial management, billing management or ophthalmologic data; downloadable computer software that provides web-based access to applications and services through a web operating system or internet portal; downloadable computer software to automate data warehousing of documents, wherein the documents do not relate to customer care, financial management, billing management or ophthalmologic data; BIOS, being a downloadable basic input/output system computer program; downloadable computer search engine software; scientific instruments and devices for the testing, screening and analysis of pharmaceuticals, for chemical screening and analysis of biological substances and for nucleic acid characterization; computer hardware and peripheral devices used in the development, testing, screening and analysis of pharmaceuticals, for chemical screening and analysis, for the development, testing, screening and analysis of biological substances and for nucleic acid characterization; downloadable computer software for operating and controlling automatic laboratory equipment used for transferring, dispensing and diluting liquids in drug screening applications; downloadable computer programs for use in robot manipulation; laboratory furniture, namely, modular tables that can be interconnected to form a variety of system configurations for use in laboratory automation; downloadable computer software for operating robots containing microplate readers, washers, and incubators for pharmaceutical laboratory use; semiconductor that performs chemical and biological material analysis; microfluidic devices and instruments used for the testing, screening and analysis of pharmaceuticals, for the testing, screening and analysis of biological substances and for nucleic acid characterization; laboratory equipment, namely, robot manipulators, laboratory consumable dispensers, laboratory sample conditioners being laboratory equipment, namely, incubators, stirrers, mixers, dispensers, and aspirators; laboratory measurement devices for measuring absorbency, weight and volume of pharmaceutical samples; laboratory pipettes; pipette tips, glassware and filters for use in laboratories; automatic laboratory equipment, namely, a robotic workstation consisting of robotic arms used for transferring, dispensing and diluting liquids in drug screening applications comprising automated pipetters configured to dispense fluids into and remove fluid from microtiter plates; computer-controlled laboratory robots; downloadable computer software for controlling and managing patient medical information; downloadable scientific and medical data via the internet; downloadable computer software for medical services, namely, medical diagnostic software and medical testing software for medical laboratory data management, patient record keeping, tracking, recording, monitoring, analyzing and reporting medical data obtained related to newborn screenings; downloadable computer software used by research scientists to acquire, manage and analyze molecular biology and life science data and information; downloadable computer software, namely, software for use in database management in the field of bioinformatics; optical imaging devices, namely, a fluorescence imaging system comprised of computer imaging hardware, a computer, monitor and downloadable imaging software for use therewith, not for medical use; electronic light imaging system for detecting very low levels of light, namely, a CCD camera and light-tight imaging chamber for scientific and engineering use; downloadable computer software used to acquire, store, archive, retrieve, track, coordinate and analyze internal light images for medical research and scientific purposes; downloadable computer software for scientific analysis of genetic sequences; downloadable software in the field of DNA research for acquisition, analysis and processing of scientific, diagnostic, pharmaceutical, biological, biotechnological and veterinary data; laboratory robots for moving microplates between storage racks and laboratory equipment, namely, laboratory readers, washers, dispensers and incubators; downloadable computer software for controlling robots that move microplates between storage racks and laboratory

equipment, namely, laboratory readers, washers, dispensers and incubators; user manuals sold as a unit with the foregoing goods; All the foregoing excluding any goods that feature or utilize public key encryption; Computer software platforms, downloadable, for scientific analysis in the field of nucleic acid analysis; Computer software platforms, recorded, for scientific analysis in the field of nucleic acid analysis; Laboratory apparatus and computer systems for use in protein purification; Laboratory apparatus and instruments for extracting DNA; Laboratory apparatus and instruments for extracting nucleic acid; Laboratory chemical reactors; Laboratory devices for detecting genetic sequences; Laboratory equipment and supplies, namely, test tubes; Magnetic separators for scientific use; Medical laboratory research instruments for DNA analysis; Medical laboratory research instruments for nucleic acid isolation; Research laboratory analyzers for measuring, testing and analyzing blood and other bodily fluids; Scientific instrumentation for measuring proteins; Scientific instruments, namely, electronic analyzers for testing and analyzing chemical and biological substances for the presence, absence, or quantity of biologics; Diagnostic apparatus for testing food; Scientific instruments used in laboratory sample preparation for magnetic particle separation, namely, magnetic beads, magnetic particle concentrators, magnetic particle analyzers, magnetic particle separators; scientific instruments used in laboratory for preparation of samples using magnetic particles for chemical, biological or physical analysis or purification, namely, functional magnetic beads, namely, chemically activated beads and beads modified with specific antibodies, magnetic purification beads, buffer-solutions, solvents, suspension agents, sample preparation kits and cartridges, laboratory apparatuses and instruments for preparation of samples using magnetic beads for chemical, biological or physical analysis or purification, namely, functional magnetic beads for binding analytes for chemical, biological or physical analysis, namely, chemically activated beads and beads modified with specific antibodies, magnetic purification beads for chemical, biological or physical purification of analytes, buffer-solutions, solvents, suspension agents, sample preparation kits; Testing kits comprising a microarray and DNA array for chromosome analysis for medical purposes or medical research purposes; chromosome testing kits comprising a microarray for use in in vitro fertilization (IVF) clinics or medical research laboratories; kits comprising a microarray for testing chromosome content for use in assisted reproductive technologies for medical purposes or medical research purposes; Laboratory apparatus and instruments for homogenizing, mixing, disrupting, and shaking samples; homogenizers, high-shear homogenizers, hand-held homogenizers, high- power homogenizers, programmable homogenizers, industrial homogenizers, multi- sample homogenizers, automated/robotic homogenizers, ultrasonic cell disrupters, bead-mill homogenizers, tissue grinders, glass homogenizers, parts and accessories, namely, probes, tubes, and beads for use with laboratory apparatus and instruments, homogenizer probes/tips, homogenizer containers/vessels, homogenizer sample tubes, homogenizer motor-stand assemblies, homogenizer sealed-chamber assemblies, homogenizer beads, homogenizer quick-connect couplings, homogenizer external speed controls, and homogenizer vessel-restraint disks; Laboratory apparatus and instruments for use with cell culture applications for cell-based assays; Laboratory apparatus and instruments for performing chromogenic assays; Laboratory apparatus and instruments for identifying, managing, tracking and analyzing cell cultures; apparatus and instrument for scientific research used to acquire cell data; Apparatus and instrument for scientific research used to acquire cell data, namely, automated cell counter, bright field cell counter, fluorescence cell counter, cell imaging system that quantifies cells in samples, cell analyzer, cytometer, microscope, as well as parts designed to be used therewith; Measuring devices for measuring pressure, temperature, chemical compound concentrations and optical signals, such as fluorescence and chemiluminescence for diagnostic sample testing, not for medical use; sensors and detectors for testing UV fluorescence and chemiluminescence for diagnostic sample testing, not for medical use; laboratory apparatus for recording, transmission or reproduction of diagnostic data, sound or images, namely, cameras, microscopes, photometers, microplate photometers, ELISA (enzyme-linked immunosorbent assay) readers, photomultipliers and microplate readers; laboratory software for recording, transmitting and reproducing diagnostic data, sound and images; biochips for research or scientific purposes; plates having multi-well arrays that can be used in chemical analysis, biological analysis or patterning for scientific, laboratory or medical research use; Devices for measuring chemical levels, in particular antigen levels, in water or water-based solutions for use in diagnostic sample testing, for detecting allergies and not for medical purposes, all of the foregoing limited to devices for examining a product of which the smallest carrier unit comprises no more than one kind of diagnostic preparation or substance, other than the aforesaid goods for use with blood reserves and medical transfusion products, and limited to use in immunofluorescence-based diagnostics using tissues and transfected eukaryotic cells as substrates; Collections of DNA and gene sequences for research and reference purposes provided as DNA microarrays and DNA chips; Imaging apparatus and software for detecting and studying tumors for scientific research and laboratory purposes; imaging apparatus and software for detecting and studying in vivo disease models for scientific research and laboratory purposes; imaging apparatus for use in the field of assessment of bioengineered tissues and organs for scientific research and laboratory purposes; electronic equipment for scientific research, namely, ultrasound scanners, ultrasound imaging devices, and light-tight imaging chamber for use with a CCD camera, other than for medical or veterinary purposes; Instruments for testing, processing or detecting biological samples for laboratory purposes, namely, an automatic analytical device for quantifying levels of 1,25-dihydroxyvitamin D; computer software for use in analyzing and managing biological data; Microplate readers; measuring devices, namely, fluorometers; downloadable and recorded computer software for use in medical decision support systems; downloadable and ecorded computer software for calculation and assessment of health risks and risks for genetic disorders

Cl.10;Apparatus for DNA and RNA testing for medical purposes; Blood testing apparatus; Medical diagnostic instruments for the analysis of body fluids; Sample preparation device for medical diagnostic uses; Medical diagnostic apparatus for testing DNA and RNA samples; Medical instruments used in the medical diagnosis and treatment of patients, for use in magnetic particle separation of biological samples; medical instruments used in the medical diagnosis and treatment of patients for use in preparation of biological samples for medical, chemical, biological, biochemical or physical analysis or purification; medical apparatuses and instruments used in the medical diagnosis and treatment of patients, for use in magnetic particle separation of biological samples; medical apparatuses and instruments used in the medical diagnosis and treatment of patients, for use in preparation of biological samples of magnetic particles for medical, chemical, biological, biochemical or physical analysis or purification; Elution and handling boxes for radio-isotope generators, namely apparatus for production and elution of sterile 99m technetium solution to be used in hospitals and radiopharmacies and containers specifically designed for transporting and holding radio-isotope generators; Assay detection and measuring apparatus for medical and diagnostic use, namely, tubes, vials and plates; Medical apparatus and instruments for medical examinations and medical diagnosis, namely, flatbed CT scanners, drum CT scanners and hand-held X-ray scanners; medical apparatus and instruments for apheresis; Chemiluminescence detectors for medical examinations and medical diagnosis, in particular chemiluminescence-immunoassay (CLIA)- readers for the detection of allergies, neurological diseases, infectious diseases, autoimmune diseases, and cancer; Microscopes Medical ultrasound apparatus; medical imaging apparatus for use in the field of tumor detection, differentiation and evaluation; medical imaging apparatus for use in the field of in vivo disease detection, differentiation and evaluation; medical imaging apparatus incorporating medical imaging software; medical imaging apparatus for use in the field of assessment of bioengineered tissues and organs for clinical use; medical equipment for diagnosis and for therapy, namely, ultrasound scanners, ultrasound imaging devices, and light-tight imaging chamber for use with a CCD camera for medical purposes; Diagnostic apparatus for medical purposes for detecting 1,25- dihydroxyvitamin D deficiency; diagnostic instruments for medical use for differential diagnosis of hypercalcaemia, renal disease, secondary hyperparathyroidism, hypocalcaemia and in distinguishing Vitamin D resistance syndromes from Vitamin D deficiency; medical diagnostic testing instruments for use in immunoassay procedure; medical diagnostic instruments for monitoring 1,25 dihydroxyvitamin D levels for diagnosing calcium metabolism disorders and their treatments, used in conjunction with other clinical and laboratory data; Medical diagnostic apparatus for medical purposes for the testing and processing of immunoassays; diagnostic

instruments for medical use for the analysis of immunoassays; medical diagnostic testing instruments for use in immunoassay procedure testing; medical diagnostic instruments for the analysis of immunoassays; Genetic testing apparatus for medical purposes

Cl.40;Treatment of biopharmaceutical materials; custom manufacture of cells and vectors for diagnostic, medical and commercial applications in relation to cell and gene therapies; consultancy and advisory services relating to the aforesaid services; manufacture of compounds containing nucleosides to the order and specification of others; Treatment of materials; recycling of waste and trash; air purification and treatment of water; printing services; food and drink preservation.

Cl.42;Scientific and industrial research and analysis in the field of life sciences; scientific research for others, namely, the testing, screening and analysis of pharmaceuticals, chemical screening and analysis, the testing, screening and analysis of biological substances and nucleic acid characterization; chemical analysis and research, namely, performing pharmaceutical screening assays for others; development and testing, screening and analysis of pharmaceuticals, chemical and biological substances for use in drug discovery research; in vitro and in vivo drug discovery, analysis and screening services for use by scientists and researchers in discovering and developing new drug therapies in the life science industry; performance of chemical or biological material analysis or diagnostics, namely, detection and screening for biological or chemical substances, capillary electrophoresis, chemical or biological separation, and nucleic characterization; medical laboratories; medical research; providing scientific information about products and services in the fields of human and environmental health technology; scientific research and development services, namely, collecting information and user comments about the scientific and technological qualities of products and services in the fields of human and environmental health technology; providing on-line, non-downloadable, Internet-based software application for providing information and the ability to search information in the field of chemistry, namely, information on chemicals, chemical structures and properties, related molecules, and chemical supply information, supplier catalogs, supplier information, availability, and procurement; providing an online interactive database in the field of chemistry, featuring chemical searching and information integration; providing on-line, non-downloadable computer software for scientific analysis of genetic sequences; providing on-line, non-downloadable computer software for medical services, namely, medical diagnostic software and medical testing software for medical laboratory data management, patient record keeping, tracking, recording, monitoring, analyzing and reporting medical data obtained related to newborn screenings; providing on-line, non-downloadable computer software for controlling and managing patient medical information; Scientific services for the pharmaceutical industry and research and design relating thereto, namely scientific and technical consulting and research services relating to the development of drug screening bioassays for use by research laboratories; Scientific and technical consulting and research services for the pharmaceutical industry, namely, scientific and technical consulting and research services relating to protein labelling to conduct life science and drug screening research; Pharmaceutical drug development services; drug screening services, namely, scientific research to identify synergistic or antagonistic interactions between small-molecule drugs, therapeutic antibodies and proteins for therapeutic purposes; Custom cell-line engineering services; gene base-editing services for research purposes; gene engineering services; research and development services in the creation of databases or collections of information on biologicals including cells and cell lines for research purposes; creating and providing databases or collections of information on normal and mutated genes for research purposes; providing DNA reference standards for research purposes; providing DNA reference databases being collections of DNA and gene sequences for research purposes; research on cell line models; contract research on cell line models; research and development services relating to targeting therapies to individuals; establishing patient genotypes for research or analysis purposes; research and development services relating to combining therapies for individuals; research and development relating to reagents; disease modelling for research purposes; design of clinical trials for research purposes; research and development in re-positioning existing drugs from other therapeutic indications; consultancy and advisory services relating to the aforesaid services; all of the aforesaid services relating to biological and medical research and research and development in the field of cells and cell therapies, genome editing, genetic engineering and gene therapies; Application service provider (ASP) featuring software for use in public health programs, specifically for collecting and tracking health screening data; Blood bank services; Creating and maintaining blogs for others, providing temporary use of non-downloadable computer software for use in posting, transmitting, receiving, retrieving, organizing, searching and reviewing text, voice, audio and visual content and data via computers, mobile and handheld computing devices, and wired and wireless communication devices; application service provider (asp) services featuring software used for the dissemination, distribution and review of text, voice, audio and visual content and data via optical and electronic communication networks; providing temporary use of non-downloadable computer software for social networking; hosting an online website featuring web portals, web logs, blogs, electronic bulletin boards, collaboration and wiki sites related to the dissemination, distribution and review of online content in a wide variety of subject-matter, in particular scientific and diagnostic subject-matter; Scientific and technological services and research and design relating thereto; industrial analysis, industrial research and industrial design services; quality control and authentication services; design and development of computer hardware and software.

Cl.44;Medical diagnostic testing services; medical diagnostic testing services, namely, testing for tick-borne infections; Medical analysis services for diagnostic and treatment purposes provided by medical laboratories; medical and health services relating to DNA, genetics and genetic testing; genetic testing for medical purposes; DNA screening for medical purposes; medical imaging services; optical imaging for medical diagnostic use; providing medical information; providing medical information from a web site; providing online medical record services other than dentistry, namely, maintaining personal medical history records and files; rental of medical apparatus and instruments; Medical services; veterinary services; hygienic and beauty care for human beings or animals; agriculture, aquaculture, horticulture and forestry services.

Cl.7; **Plants, devices and machines for the treatment of waste and metal scrap (in particular for pressing, shredding, compacting, mixing, compressing, cutting, conveying, discharging, sorting, extracting, recycling, separating, reprocessing, drying, dedusting, dewatering, packaging, stacking and disposing); presses (in particular hole-drawing presses, scrap presses, cotton presses, baling presses, packing presses, test presses, forging presses, bending and straightening presses, briquetting presses, shearing presses, shear- packing presses, packaging presses, rotary shears, each of the aforesaid also operated electrically, pneumatically and hydraulically); shredding machines (namely mills, crushers and shears for shredding all kinds of materials such as, among others, metal scrap, metal shavings, slag, garbage, wood, paper, rubber, plastic, glass and carbon anodes, in particular scrap shears, press scissors and waste/garbage shears); scrap processing and recycling machines; dispensing machines; electric generators; couplings and devices for power transmission, other than for land vehicles; robots (in particular industrial robots, transport robots (terms considered too vague by the International Bureau - rule 13 (2) (b) of the Common Regulations), waste processing robots); mechanical equipment for agriculture, earthworks, construction work, oil and gas extraction work and mining work (in particular presses, crushing machines and packaging machines); machine-operated apparatus for collecting and removing waste; machines and machine tools for material processing and production, recycling, separating, shearing, cutting, shredding, chipping, pressing; power-operated tools, construction machines and equipment for construction, demolition, cleaning and maintenance work; emergency and rescue machines and machine tools; machine tools; motors and engines, other than for land vehicles; motors, drives, machine parts and controls for the operation of machines and engines; drive devices for machines; pumps, compressors and blowers (terms considered too vague by the International Bureau - rule 13 (2) (b) of the Common Regulations); conveyor systems and conveyor belts; assemblies, parts, spare parts and accessories for all the aforesaid goods, included in this class.**

Cl.8; **Hand-operated devices and tools for material processing as well as for construction, repair and maintenance work (in particular devices for changing machine parts in machines, e.g. in machines for processing, such as recycling, separating, shearing, cutting, shredding, chipping, pressing of any type of material, such as scrap shears, waste/garbage shears, shear presses, shear packing presses, packing presses, briquetting presses, rotary shears, machine tools); hand-operated devices for collecting and removing waste; lifting tools; knifeware, knifeware and cutting equipment, cutting knives, cutting belts, saw blades, cutting blades, cutting discs (all of the above in particular for tools, equipment, machines and plants); parts and accessories for all the aforesaid goods, included in this class.**

Cl.9; **Scientific, research, navigation, surveying, photographic, film, audiovisual, optical, weighing, measuring, signaling, detecting, testing, controlling, rescuing and teaching apparatus and instruments; scientific research and laboratory**

apparatus, teaching apparatus and simulators; apparatus, instruments and cables for electricity; apparatus and instruments for conducting, switching, converting, storing, regulating or controlling the distribution or use of electricity; control devices and computer-based controls; recorded data; recorded and downloadable media, computer software, blank digital or analog recording and storage media; computer programs and data carriers; information technology, audiovisual, multimedia and photographic devices; computers and computer peripheral devices; devices and instruments for recording, transmitting, reproducing or processing sound, images or data; magnets, magnetizers and demagnetizers; measuring, detection, monitoring and control devices; material testing instruments and machines; navigation, guidance, tracking, targeting and map making devices; optical devices, enhancers and correctors; safety, security, protection and signalling devices; scientific and laboratory devices for treatment using electricity; parts and accessories for all the aforesaid goods, included in this class.

Cl.11; Flues and installations for conveying exhaust gases; air filters for industrial and household use; dry, wet and electrostatic filters for air regeneration; heating, ventilation, air conditioning and air purification devices and systems; industrial treatment installations; industrial installations for filtering liquids; installations for collecting gases; installations for collecting liquids; installations for separating impurities from molten metals; combustion and pyrolysis plants, in particular waste incineration plants; devices for the thermal, chemical and radioactive disinfection of waste and facilities that come into contact with waste; personal heating and drying implements; parts and accessories for all the aforesaid goods, included in this class.

Cl.35; Commercial services and consumer information services, namely auctioneering services, rental of vending machines, agency services, organizing and arranging of business introductions, collective purchasing services, commercial evaluation services, preparation of competitions, agency business, import and export services (terms considered too vague by the International Bureau - rule 13 (2) (b) of the Common Regulations), negotiation and agency services, ordering services, price comparison services, procurement services for third parties, subscription services, retail and wholesale services relating to industrial facilities, containers of metal for storage and transport, cables and wires of common metal [not for electrical purposes], containers and transport and packaging items made of metal, waste containers [garbage containers] for industrial use made of metal, metal hardware, unprocessed and semi-processed materials of metal (not specified for use), locksmith goods, plants, devices and machines for the treatment of waste and metal scrap (in particular for pressing, shredding, compacting, mixing, compressing, cutting, conveying, discharging, sorting, extracting, recycling, separating, reprocessing, drying, dedusting, dewatering, packaging, stacking and disposing), presses (in particular hole-drawing presses, scrap presses, cotton presses, baling presses, packing presses, test presses, forging presses, bending and straightening presses, briquetting presses, shearing presses, shear- packing presses, packaging presses, rotary shears, each of the aforesaid also operated electrically, pneumatically and hydraulically), shredding machines (namely mills, crushers and shears for shredding all kinds of materials such as, among others, metal scrap, metal shavings, slag, garbage, wood, paper, rubber, plastic, glass and carbon anodes, in particular scrap shears, press scissors and waste/garbage shears), scrap processing and recycling machines, dispensing machines, electric generators, couplings and devices for power transmission (other than for land vehicles), robots (in particular industrial robots, transport robots, waste processing robots), mechanical equipment for agriculture, earthworks, construction work, oil and gas extraction work and mining work (in particular presses, crushing machines and packaging machines), machine-operated apparatus for collecting and removing waste, machines and machine tools (for material processing and production, recycling, separating, shearing, cutting, shredding, chipping, pressing), power-operated tools, construction machines and equipment (for construction, demolition, cleaning and maintenance work), emergency and rescue machines and machine tools, machine tools, motors and engines (other than for land vehicles), motors, drives, machine parts and controls for the operation of machines and engines, drive devices for machines, pumps, compressors and blowers, conveyor systems and conveyor belts, hand-operated devices and tools for material processing as well as for construction, repair and maintenance work (in particular devices for changing machine parts in machines, e.g. in machines for processing, such as recycling, separating, shearing, cutting, shredding, chipping, pressing of any type of material, such as scrap shears, waste/garbage shears, shear presses, shear packing presses, packing presses, briquetting presses, rotary shears, machine tools), hand-operated devices for collecting and removing waste, lifting tools, knifeware (in particular for tools, equipment, machines and plants), knifeware and cutting equipment (in particular for tools, equipment, machines and plants), cutting knives (in particular for tools, equipment, machines and plants), cutting belts (in particular for tools, equipment, machines and plants), saw blades (in particular for tools, equipment, machines and plants), cutting blades (in particular for tools, equipment, machines and plants), cutting discs on particular for tools, equipment, machines and plants, scientific, research, navigation, surveying, photographic, film, audiovisual, optical, weighing, measuring, signaling, detecting, testing, controlling, rescuing and teaching apparatus and instruments, scientific research and laboratory apparatus, teaching apparatus and simulators, apparatus, instruments and cables for electricity, apparatus and instruments for conducting, switching, converting, storing, regulating or controlling the distribution or use of electricity, control devices and computer-based controls, recorded data, recorded and downloadable media, computer software, blank digital or analog recording and storage media, computer programs and data carriers, information technology, audiovisual, multimedia and photographic devices, computers and computer peripheral devices, devices and instruments for recording, transmitting, reproducing or processing sound, images or data, magnets, magnetizers and demagnetizers, measuring, detection, monitoring and control devices, material testing instruments and machines, navigation, guidance, tracking, targeting and map making devices, optical devices, enhancers and correctors, safety, security, protection and signalling devices, scientific and laboratory devices for treatment using electricity, exhausts and installations for exhaust fumes, filters for industrial and household use, dry, wet and electrostatic filters for air regeneration, heating, ventilation, air conditioning and air purification devices and systems, industrial treatment installations, industrial installations for filtering liquids, installations for collecting gases, installations for collecting liquids, installations for separating impurities from molten metals, combustion and pyrolysis plants, in particular waste incineration plants, devices for the thermal, chemical and radioactive disinfection of waste and facilities that come into contact with waste, personal heating and drying implements, assemblies for all the aforesaid goods, parts for all the aforesaid goods, wear and spare parts for all the aforesaid goods, accessories for all the aforesaid goods; rental and leasing of items in connection with the provision of the aforementioned services, included in this class; consultancy and information relating to the aforesaid services, included in this class.

Cl.37; Rental of tools, construction machinery and equipment for construction, assembly, demolition, installation, cleaning, repair and maintenance work (terms considered too vague by the International Bureau - rule 13 (2) (b) of the Common Regulations); rental and leasing of items in connection with the provision of the aforementioned services, included in this class; consultancy and information relating to the aforesaid services, included in this class.

Cl.40; Custom fabrication and manufacturing services; energy production (in particular from renewable sources); materials treatment, processing and conversion; recycling of waste and trash; sorting of waste and recyclable materials; air and water conditioning and purification; rental of equipment for the treatment and transformation of materials, for

energy production and for custom manufacturing; rental and leasing of items in connection with the provision of the aforementioned services, included in this class; consultancy and information relating to the aforesaid services, included in this class.

Cl.42;Design services; industrial analysis, industrial research and industrial designer services; IT services (in particular development, programming and implementation of software, development of computer hardware, hosting services, software as a service [saas] and rental of software, rental of computer hardware and systems, IT consultancy and information services, IT security services, IT protection services and IT repair services, data duplication and conversion services, data coding services, computer analysis and diagnostics, research and development and implementation of computers and computer systems, computer project management services, data mining, digital watermarking, computer technology consulting services, technological services relating to computers, computer network services, updating computer system data bases, data migration services, updating websites for third parties, monitoring computer systems remotely); testing, authentication and quality control; science and technology services; design and development of computer hardware and software; all of the aforementioned services in relation to industrial facilities, containers of metal for storage and transport, cables and wires of common metal [not for electrical purposes], containers and transport and packaging items made of metal, waste containers [garbage containers] for industrial use made of metal, metal hardware, unprocessed and semi-processed materials of metal (not specified for use), locksmith goods, plants, devices and machines for the treatment of waste and metal scrap (in particular for pressing, shredding, compacting, mixing, compressing, cutting, conveying, discharging, sorting, extracting, recycling, separating, reprocessing, drying, dedusting, dewatering, packaging, stacking and disposing), presses (in particular hole-drawing presses, scrap presses, cotton presses, baling presses, packing presses, test presses, forging presses, bending and straightening presses, briquetting presses, shearing presses, shear-packing presses, packaging presses, rotary shears, each of the aforesaid also operated electrically, pneumatically and hydraulically), shredding machines (namely mills, crushers and shears for shredding all kinds of materials such as, among others, metal scrap, metal shavings, slag, garbage, wood, paper, rubber, plastic, glass and carbon anodes, in particular scrap shears, press scissors and waste/garbage shears), scrap processing and recycling machines, dispensing machines, electric generators, couplings and construction work, oil and gas extraction work and mining work (in particular presses, crushing machines and packaging machines), machine-operated apparatus for collecting and removing waste, machines and machine tools (for material processing and production, recycling, separating, shearing, cutting, shredding, chipping, pressing), power-operated tools, construction machines and equipment (for construction, demolition, cleaning and maintenance work), emergency and rescue machines and machine tools, machine tools, motors and engines (other than for land vehicles), motors, drives, machine parts and controls for the operation of machines and engines, drive devices for machines, pumps, compressors and blowers, conveyor systems and conveyor belts, hand-operated devices and tools for material processing as well as for construction, repair and maintenance work (in particular devices for changing machine parts in machines, e.g. in machines for processing, such as recycling, separating, shearing, cutting, shredding, chipping, pressing of any type of material, such as scrap shears, waste/garbage shears, shear presses, shear packing presses, packing presses, briquetting presses, rotary shears, machine tools), hand-operated devices for collecting and removing waste, lifting tools, knifeware (in particular for tools, equipment, machines and plants), knifeware and cutting equipment (in particular for tools, equipment, machines and plants), cutting knives (in particular for tools, equipment, machines and plants), cutting belts (in particular for tools, equipment, machines and plants), saw blades (in particular for tools, equipment, machines and plants), cutting blades (in particular for tools, equipment, machines and plants), cutting discs (in particular for tools, equipment, machines and plants), scientific, research, navigation, surveying, photographic, film, audiovisual, optical, weighing, measuring, signaling, detecting, testing, controlling, rescuing and teaching apparatus and instruments, scientific research and laboratory apparatus, teaching apparatus and simulators, apparatus, instruments and cables for electricity, apparatus and instruments for conducting, switching, converting, storing, regulating or controlling the distribution or use of electricity, control devices and computer- based controls, recorded data, recorded and downloadable media, computer software, blank digital or analog recording and storage media, computer programs and data carriers, information technology, audiovisual, multimedia and nets for protection against accidents; protection devices for personal use against accidents; electronic publications recorded on computer media; electronic publications, downloadable; media and publishing software; downloadable educational course materials; instruction manuals in electronic format; training manuals in the form of a computer program; training software; simulation software for training purposes; inflatable apparatus for life-saving purposes; life-saving apparatus and instruments; escape slides; emergency signal transmitters; emergency warning lights; rafts (life -) for emergency use; emergency flares; transmitters for emitting distress signals; portable emergency intercoms; mobile apps; software; fire detection software; mobile software; software for smartphones; computer application software for use in implementing the internet of things [IoT]; computer software for use in remote meter monitoring; digital panel meters; real-time data processing apparatus; measuring devices, electric; electronic meters; electronic surveillance apparatus; internet of things [IoT] gateways; intelligent gateways for real-time data analysis; artificial intelligence software for surveillance; measuring, detecting and monitoring instruments, indicators and controllers; real-time collaborative editing [rtce] platforms [software]; fire hose nozzles; sensors for measuring instruments; computer-aided engineering [cae] software; product lifecycle management software; predictive maintenance software; sprinkler apparatus for fire protection; monitoring instruments; maintenance software; software for operating an online shop; software for evaluating customer behaviour in online shops; databases; recorded data files; digital or electronic directories; data recorded electronically; computer software platforms; computer application software; computer programs, downloadable; computer software adapted for use in the operation of computers; computer software development tools; software for tablet computers; computer software designed to estimate costs; computer software for data processing; document management software; downloadable computer software for the transmission of data; downloadable computer software for the management of information; computer software for electronic bulletin boards; computer programs for project management; computer software for application and database integration; audiovisual teaching apparatus; audiovisual teaching devices; pre-recorded compact discs; media content; memories for databases; data collection apparatus; digital signal processing apparatus; digital input and output scanners; communications equipment; alarms and warning equipment; computers and computer hardware; computer components and parts; customer relation management [CRM] software; computer communication software to allow customers to access bank account information and transact bank business; encoded loyalty cards; social software; retail software; downloadable applications for use with mobile devices; safe load indicating apparatus; computer hardware modules for use in electronic devices using the internet of things [IoT]; water sprinkling devices for fire control; fire sensors; flame detectors; fire protection apparatus; fire modeling and simulation software; sprinkler systems for fire protection; sprinkler apparatus for fire extinguishing; sprinkler apparatus [automatic] for fire extinguishing; fire detectors; fire-extinguishing systems; fire extinguishing apparatus for automobiles; virtual reality [VR] motion simulators; sensors for monitoring physical movements; virtual and augmented reality software; computer programs for network management; communication and networking software; all of the aforementioned computer software and computer hardware except for use in connection with grilling and cooking equipment; all of the aforementioned goods also as virtual components including downloadable image files, 3D models, virtual assets, especially for use in the metaverse, virtual reality (VR), augmented reality (AR), and extended reality (XR) and other virtual online environments; downloadable image files and software featuring virtual hydraulic control components, virtual hydraulic pressure cylinders, virtual hydraulic control blocks, virtual hydraulic valves, virtual hydraulic rescue tools, virtual hydraulic jacks and virtual machine shop equipment for use in metaverse environments and other virtual online environments; signal amplifiers; chopper amplifiers; pressure transmitters; inflatable lifeboats.

Cl.11;Apparatus and installations for lighting, heating, cooling, steam generating, drying, ventilating, water supply and sanitary purposes; safety fittings for gas pipes; security lighting; lighting for use with security systems; motion sensitive security lights; luminaires for security use; emergency lighting; emergency lighting apparatus; pocket torches, electric; pocket searchlights; emergency drench showers.

Cl.12;Vehicles; apparatus for locomotion by land, air or water;; rescue drones; rescue sleds; structural parts for ambulances; tool trolleys.

Cl.16;Printed matter except for recipe books, brochures and instruction manuals for grills and accessories; bookbinding material; teaching materials [except apparatus]; plastic sheets, films and bags for wrapping and packaging; educational publications except for grilling, cooking, food and gastronomic applications; instructional manuals for teaching purposes except for grilling, cooking, food and gastronomic applications; wrapping, packaging and storage bags and articles made of paper, cardboard or plastic.

Cl.17;Flexible pipes, tubes and hoses, not of metal; hoses for pneumatic tools.

Cl.18;Holdalls; rucksacks; luggage, bags, wallets and carrying bags; tool bags, empty.
